

Football League Hub

Brand-safe football content generation with factual guardrails and human review

LEARNER DETAILS

Suvadip Kolay [BCA - 2025]

MUJ Roll No. 251450213249

Email: 251450213249@mujonline.edu.in

SELECTED CAPSTONE OPTION

05. Brand-Safe Content and Campaign Studio: Suvadip's Content Studio

PROJECT DESCRIPTION

Suvadip's Content Studio is a brand-safe football content generator for an independent sports journalist. It turns a visible, approved fact pack from Football League Hub into reviewable match previews or social posts. Gemini or Groq generates drafts; human review, source visibility and an optional Slack demonstration keep editorial decisions controlled.

PROBLEM / OPPORTUNITY STATEMENT

Independent sports journalists need timely football updates, but gathering facts, drafting content and checking claims across sources can be slow and risks unsupported statements. The project creates an approved fact pack: the dashboard supplies context, while Content Studio generates a constrained draft for human verification before sharing.

Visible facts in, controlled content out

The dashboard provides current-season source context. Suvadip's Content Studio restricts the AI to the visible approved fact pack, displays the cited facts alongside the draft and requires a human approval before any optional Slack demonstration post.

1 Approved facts**2** AI draft**3** Human review**4** Optional Slack demo

STEP 1

LIVE FACTS READY

Approved fact pack

Competition

Premier League

Competition

Premier League

Current leader

Manchester City FC are first with 9 points after 3 matches.

Closest challenger

Arsenal FC are second with 9 points after 3 matches.

Upcoming fixture

Crystal Palace FC vs Ipswich Town FC is an upcoming Premier League fixture.

Content scope

Use current-season football facts only. Do not add unsupported information.

Only these facts are sent to Gemini. The source list is shown again with every generated draft.

STEP 2

AI DRAFT ONLY

Choose draft format

Match preview

Short website or newsletter preview

Social post

Concise post for Suvadip's football journal

Optional reviewer direction

Example: Make it more energetic, but do not add facts.

Generate fact-checked draft →

Guardrail: The prompt prohibits invented scores, transfers, injuries, betting advice and unsupported statistics.

STEP 3 - HUMAN REVIEW

APPROVED - READY TO POST

Review before publishing

MATCH PREVIEW DRAFT

Crystal Palace vs Ipswich Town: Premier League preview

In the Premier League, Crystal Palace host Ipswich Town. Both sides aim to collect points while Manchester City and Arsenal sit level on nine points after three matches.

Draft ready for editorial review.

FACTS USED IN THIS DRAFT

Competition: Premier League

Current leader: Manchester City FC are first with 9 points after 3 matches.

Closest challenger: Arsenal FC are second with 9 points after 3 matches.

Upcoming fixture: Crystal Palace FC vs Ipswich Town FC is an upcoming Premier League fixture.

☒ I checked the cited facts and approve this draft for Suvadip's independent sports-journalism work.

Generate revision

Approved

Post to Slack demo channel

Approval unlocks an optional, separately confirmed post to your configured private Slack demo channel. It never posts automatically.

Working journey: approved fact pack -> generated match preview -> human review and approval

Football League Hub - Final Project Presentation

2 / 3

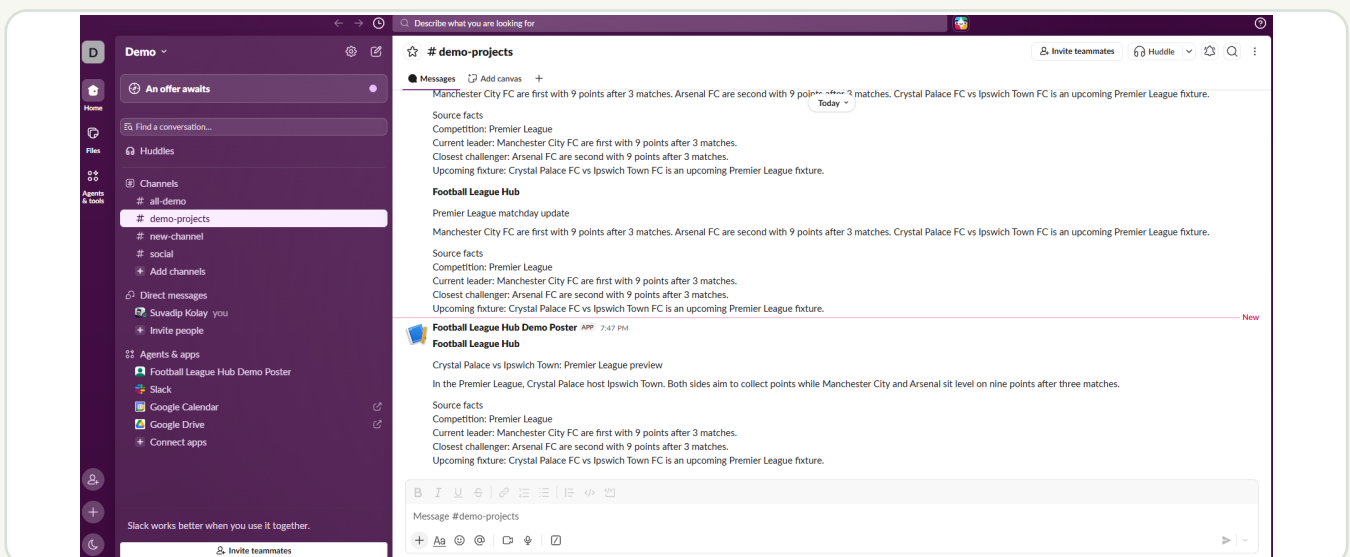

Built to be useful, reviewable and transparent

AI TOOLS / APPLICATIONS

Gemini API and Groq API for fact-constrained drafting; football-data.org for current-season tables and fixtures; Vercel for secure serverless functions; Slack webhook for an optional private demonstration post; ChatGPT / Codex for development and documentation support.

OUTCOME, METRICS AND LIMITS

Outcome: quicker, controlled football-journalism drafts with editorial ownership retained. Metrics: approval without revision; time from approved facts to a reviewable draft. Limits: provider availability and free-plan coverage; production needs quota monitoring and ongoing human approval.

Evidence: a human-approved draft posted to the configured private Slack demonstration channel
