

Football League Hub

A brand-safe football content generator with factual guardrails and human review

SELECTED SUBMISSION OPTION

05. Brand-Safe Content and Campaign Studio: Suvadip's Content Studio

Suvadip's Content Studio is a brand-safe football content generator for an independent sports journalist. Football League Hub supplies visible current-season context, while the studio turns an approved fact pack into a reviewable match preview or social post. Human editorial approval remains required before sharing.

Dashboard interface capture - settings detail shows the Football / Pitch background selector

Fast football content, checked before sharing

Problem: independent sports journalists need timely updates, but gathering facts and checking claims can be slow and risks unsupported statements. Solution: an approved fact pack, constrained AI drafting and human approval; the dashboard provides supporting source context.

01

Approved fact context

Selected European leagues, Champions League and an ISL sample-data view supply visible context. Tables, fixtures, scorer cards and full-table navigation support fact checking.

02

Responsible sources

A secure Vercel route uses football-data.org for live data. Official organiser links help visitors verify standings and fixtures independently.

03

Content Studio

Gemini drafts from an approved fact pack; Groq can be configured as a server-side backup. Human review is required; a labelled fact-only fallback preserves transparency.

VERIFIED WORKFLOW EVIDENCE

The screenshot shows a web interface for creating football content. It is divided into three steps: STEP 1: Approved fact pack, STEP 2: Choose draft format, and STEP 3: HUMAN REVIEW. In STEP 1, users can select a competition (Premier League) and view current leaders, closest challengers, and upcoming fixtures. In STEP 2, users can choose a draft format (Match preview or Social post) and generate a fact-checked draft. In STEP 3, users can review the draft before publishing.

STEP 1: Approved fact pack (LIVE FACTS READY)

Competition: Premier League

Current leaders: Manchester City FC are first with 9 points after 3 matches.

Closest challenger: Arsenal FC are second with 5 points after 3 matches.

Upcoming fixture: Crystal Palace FC vs Ipswich Town FC is an upcoming Premier League fixture.

STEP 2: Choose draft format (AI DRAFT ONLY)

Match preview: Generate fact-checked draft

Social post: Generate fact-checked draft

STEP 3: HUMAN REVIEW (APPROVED - READY TO POST)

Review before publishing

Match preview draft: Crystal Palace vs Ipswich Town: Premier League preview

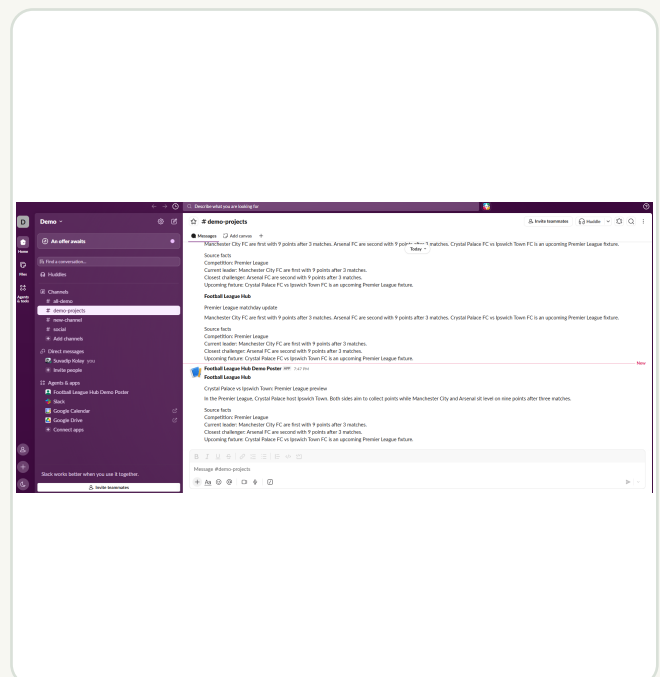

Facts used in this draft:

- Competition: Premier League
- Current leader: Manchester City FC are first with 9 points after 3 matches.
- Closest challenger: Arsenal FC are second with 5 points after 3 matches.
- Upcoming fixture: Crystal Palace FC vs Ipswich Town FC is an upcoming Premier League fixture.

I checked the cited facts and approve this draft for Sueddy's independent sports-journalism work.

Generate revision | Approve | Post to Slack demo channel

1. AI draft generated from the approved fact pack - no fallback used

2. Approved draft posted to the configured Slack demo channel

KEY DELIVERABLES, EVALUATION AND LIMITS

Deliverables: two content formats, approved fact pack, human approval, optional Slack demo post.

Metrics: approval without revision; time from facts to reviewable draft. Limits: provider availability and free-plan coverage.
